

Welcome to the “Money” task!

Press *<spacebar>* when you are ready to see the next instruction screen

On every trial, you will be given an option between two **hypothetical** cash rewards and you will decide which option you would prefer. For example:

Which would you prefer?

\$85 NOW	OR	\$100 in 1 YEAR
-------------	----	--------------------

If you'd prefer the immediate reward ("85 NOW"), press the <v> key as quickly as possible.

If you'd prefer the delayed reward ("100 in 1 YEAR"), press the key as quickly as possible.

Responses should be made using the index ('v') and middle ('b') fingers of your right hand.

Press <spacebar> when you are ready to see the next instruction screen

Remember that the rewards are hypothetical, you will not receive any of the rewards you choose. Simply imagine what you would choose if you were given these options in real life.

This task will consist of a maximum of 100 total trials.
